## Job Experience

### Laravel Blog

Personal Project

#### Roles and responsibilities:

- Database management with MySQL database with optimized queries.
- Prioritized security of the blog to avoid any security breach.
- Gathered feedback from product users.

### Laravel CRUD API

Personal Project

#### Roles and responsibilities:

- Used **Sanctum** to generate random bearer token keys per user
- Optimized the API for speed to avoid uncalled errors.
- Gathered feedback from product users.

### Email Verification API

Personal Project

#### Roles and responsibilities:

- Optimized for security since it's a verification API. It does not track user data.
- Provided options for other features like password verification.
- Gathered feedback from product users.
